

BACHELOR OF SCIENCE IN PHARMACEUTICAL SCIENCES

Joint Degree: BSPS/MSPS with Albany College of Pharmacy and Health Sciences

Albany College of Pharmacy and Health Sciences Combined Program

BS in Pharmaceutical Sciences/MS in Pharmaceutical Sciences with Concentrations

Albany College of Pharmacy and Health Sciences' five-year combined Bachelor and Master Degree in Pharmaceutical Sciences provides a strong foundation in the pharmaceutical sciences. This is a research intensive program designed for students with a strong commitment to research. The BS/MS in Pharmaceutical Sciences program will enhance a student's ability to think critically and strengthen their credentials for admission to medical school, as well as dental, veterinary and other post-graduate professional programs. The BS/MS program will also position graduates for highly competitive entry-level jobs in the pharmaceutical and biotechnology industries or government regulatory agencies as well as for entrance into PhD programs in the basic and pharmaceutical sciences.

Overview:

The combined BS/MS in Pharmaceutical Sciences program reduces the total credit requirements of the two programs by 12 credit hours. Students must complete all course requirements except for the following:

- Foundations of Pharmaceutical Sciences (PSC 431) is not required in the BS/MS program and is replaced by Foundations of the Pharmaceutical Sciences (PSC 631) which covers essentially the same course material at a graduate level. This reduces the total credit hour requirement by 2 credit hours.
- The BS program requires students to take 21 credit hours of electives. The BS/MS program requires students to take 15 credit hours of Directed Electives and 10 credit hours of MS electives for a combined total of 25 credit hours. The BS/MS program thus increases the total elective requirement by 4 credit hours.
- The BS/MS in Pharmaceutical Sciences requires students to take several research focused undergraduate courses that are electives in the BSPS program, including three semesters of Pharmaceutical Sciences Research Experience as well as the required course Thesis I.
- Research Rotation is not required in the BS/MS program. The objectives of this initial research experience will be met by completing BSPS Independent Research or equivalent research experience at ACPHS. This reduces the total credit hour requirement by 2 credit hours.

Total Credit Hours for the Pharmacology Concentration:

BS in Pharmaceutical Sciences:	123 credit hours
MS in Pharmaceutical Sciences:	<u>33</u> credit hours
Total	156

BS/MS in Pharmaceutical Sciences combined program: 146 credits

Total Credit Hours for the Pharmaceutics Concentration:

BACHELOR OF SCIENCE IN PHARMACEUTICAL SCIENCES

Joint Degree: BSPS/MSPS with Albany College of Pharmacy and Health Sciences

BS in Pharmaceutical Sciences:	125 credit hours
MS in Pharmaceutical Sciences:	<u>33</u> credit hours
Total	158

BS/MS in Pharmaceutical Sciences combined program: 149 credits

A summary of the credit hour requirements for the BS, MS completed separately, and as part of the combined programs, is shown below. Students benefit from a reduction in required course hours by an equivalent of 12 credit hours when completing the combined BS/MS.

Degree Program	BSPS Courses at ACPHS (credit hrs)	MSPS Courses at ACPHS (credit hrs)	Total Credit Hours
BSPS: Pharmacology + MSPS - Completed Separately	123	33	156
BSPS: Pharmacology/MSPS - Combined	115	31	146
BSPS: Pharmaceutics + MSPS – Completed Separately	125	33	158
BSPS: Pharmaceutics/MSPS - Combined	118	31	149
